

Voice, Ultrafast broadband and TV networks

Statement concerning Choice of Service Providers on the OFNL Network for Business Customers

Date: 12th June 2018.

Open Fibre Networks Wholesale (trading as OFNL Wholesale) are passionate about providing choice and best value to businesses connected to its fibre network.

OFNL provides an 'Open Access' network infrastructure to enable choice of providers from which you can get your voice and data services. However, there is a requirement for Service Providers to contract with OFNL Wholesale to enable the delivery of their services over the OFNL network infrastructure.

OFNL Wholesale has been very successful in attracting Service Providers to the network to deliver services to business clients and OFNL Wholesale has signed up the following Service Providers to deliver these business services:

<ul style="list-style-type: none">• Colt (Kings Cross site only)• euNetworks Ltd (Kings Cross site only)• Virgin Media Business (Kings Cross site only)• AlwaysOn Ltd• Amvia Limited• Anglia Telephones and Data Communications• Arrow Business Communication Ltd• Britannic Technologies Ltd• CCS Ltd• Charterhouse Voice and Data• Direct Save Telecom• Evolve• Excell Business Systems Ltd• Exponential-e Ltd• Fluidone• Garnell Technologies Ltd• Haptic Networks Ltd• IDNet• ION Networks Ltd• Jet Telecom Ltd• Jungle Networks Ltd	<ul style="list-style-type: none">• KCOM• Kee IT Services• Kyonet-IT• Love Your Broadband• Maintel Ltd• Marston's Telecom Ltd• New Star Networks• Orbital Net Ltd• Pure Broadband• QuantumGate Ltd• Redcentric• RTP Solutions• Sand IT• seethelight• Spitfire Network Services Ltd• Team Partners Telecommunications• Telephone Services Installations Ltd• The Comms Group• Timico• Unique Digital Software• Vodafone UK• Wave 9• Wavenet Ltd

Voice, Ultrafast broadband and TV networks

The range of services available to business customers is dependent on the business requirements and OFNL Wholesale are more than happy to discuss those requirements to identify a suitable solution using OFNL Wholesale's wholesale services.

OFNL Wholesale deliver a variety of services over the fibre network at the development and range from single phone and broadband services for a small business, through to large business connections that require Layer 2 Ethernet connectivity with bandwidths from 10Mbps up to 1Gbps and multiple voice channels delivered by Session Initiation Protocol (SIP) trunks, from 2 channels up to 30 or more channels.

OFNL Wholesale will work with our list of contracted Service Providers to deliver services for business customers at a development. OFNL Wholesale are happy to agree a contract with a Service Provider who is not currently contracted to deliver services across the OFNL infrastructure if a business would like to use their preferred Service Provider. This will be dependent on this preferred Service Provider agreeing terms with OFNL Wholesale.
